SUMMARY

A game developer with a background in science and a love for building fun, creative games. Although I lack formal industry experience, I have collaborated with various people and participated in game jams and side projects.

EXPERIENCE

EasyClap Games (Intern)

07.2024 - 09.2024

- I have worked on a small-scale PC game project as part of a side team inside the studio.
- Worked on gameplay features involving inverse kinematics, basic physics, and character animations in Unity (C#).
- Participated in the METU ATOM presentation, representing the project alongside the team.
- Gained experience in a collaborative workflow with tools like Git, Trello, Miro.

EDUCATION

Middle East Technical University (METU)

2019 – 2024

Bachelor of Science in Biology (GPA 3.03)

Relevant Elective Courses:

- Algorithms for Interactive Systems (MMI513)
- Game Programming Patterns (MMI716)
- Game Development Pipeline (MMI505)
- Procedural Sound Design (MMI522)
- Interactive Multi-Media Design I (ID313)
- Video Game Design and Development (ID417)
- Programming with Python for Engineers (CENG240)

Istanbul Technical University (ITU)

2015 - 2019

Metallurgy and Materials Engineering (Transferred to METU)

Manisa Science High School

2010 - 2014

PROJECTS

HueRo (Game Jam-Solo Project)

- I have made a challenging platformer under 24 hours in a METU GATES jam event with a color shifting mechanic.

A Dance of Destruction (GMTK 2024 Jam)

- Play as a blackhole that wants to protect Earth.
- I have participated as a programmer in a small team and worked on core mechanics, animations, and UI.

Overgrown (Term Project)

- In this School Term Project, the objective was to only prepare a scene in Unity and write a GDD, but we wanted to turn it into something playable.
- I have worked on object interactions logic, and state machine for plants.

Mentastronaut (GGJ 2025)

- We participated in Global Game Jam with a four-person team. In this arcade game, we are helping a Mentos reach the Moon by getting boost from Coke bubbles.
- I have worked on scoring, movement, cutscenes with Unity Timeline, Animator, UI.
- To see the full list of games that I worked on or access GitHub Repos, visit [my website](#) or my [itch.io page](#).

SKILLS

Tools:

Unity (C#), Godot (GDScript), Git, Python

Unity Features:

Input System, Animator, Timeline, Cinemachine, NavMesh, Physics Interactions, Scriptable Objects, Localization.

Creative Tools:

Blender and Aseprite basics for editing. Audacity and PureData for sound editing and generation.
